# REGIMENT ERRATA

EFFECTIVE 06.28.2026

Please note that typos may occur. If a discrepancy arises between the codex or rulebook and the official army builder app, assume the army builder is correct. It receives updates and hotfixes much faster than these rulebooks. We will provide a detailed changelog whenever these changes occur.

Between major rulebook, codex, and print-and-play document updates, this errata document serves as our frequently updated resource:
